

# Changing working patterns fact sheet (CWP1) How is your pension worked out

This series of fact sheets provide a guide to changes in working patterns together with information about how these changes could impact on your pension. The impact on your pension may vary depending on what scheme you are in.

Note: Any change in working patterns or breaks in service need to be agreed with your employer

Working patterns Different kinds of breaks

Part-time, term-time and seasonal working (CWP2)

Career breaks (CWP4)

Flexible and shift working **(CWP3)**Special leave, Maternity, Paternity and Adoption leave,
Parental leave and Time off for dependants **(CWP5)** 

To enable you to understand how your pension is affected you need to know how it is worked out.

classic, classic plus and premium schemes

Your classic pension =  $\frac{1}{80}$  x pensionable earnings x reckonable service

Your **premium** pension =  $\frac{1}{60}$  x **final pensionable earnings** x **reckonable service** 

Your **classic plus** pension is worked out as in **classic** for service up to 30 September 2002, and as in **premium** for service from 1 October 2002, but using your **final pensionable earnings** in both parts of the calculation. The lump sum for your **classic** service is 3 x your pension. In **premium** there is no automatic lump sum, but you can choose to convert some of your pension into a lump sum.

Your **nuvos** pension = 2.3% x your pensionable earnings each year up to 31 March, increased in line with rises in the cost of living.

Your **alpha** pension = 2.32% x your pensionable earnings each year up to 31 March, increased in line with rises in the cost of living.

This is a summary of basic scheme features. Full details are set out in the scheme rules. In the case of any difference, the scheme rules will apply.

### Changing working patterns fact sheet (CWP1)

### partnership pension account

The **partnership** pension account is very different from other NICS pension schemes.

Your employer puts money into your chosen **partnership** pension account, and you can choose whether you wish to contribute as well. Your investment fund builds up over time. Currently from age 55 onwards, you can use your investment fund to buy an **annuity** (a pension for life) from a UK branch or office of an insurance company authorised to carry on long-term insurance business. You can also take up to 25% of your fund as a lump sum. You do not have to retire to do this but can carry on working whilst receiving your pension.

You choose what percentage, if any, of your **pensionable earnings** you wish to pay into your investment fund. Your employer will also make contributions and these are calculated as a percentage of your **pensionable earnings**, regardless of your working pattern. If you do make any contributions, your employer will match your contributions up to an additional 3% of your **pensionable earnings**.

# Changing working patterns fact sheet (CWP1) Boosting your pension

If you change your working pattern to work fewer hours, your pension will also reduce and you may wish to consider ways of increasing the value of your pension benefits by:

- buying added pension
- additional voluntary contributions;
- taking out a Stakeholder pension.
- increasing your partnership contributions

Leaflets about these options are available on request from Civil Service Pensions or on the CSP(NI) website at:

www.finance-ni.gov.uk/civilservicepensions-ni

## Changing working patterns fact sheet (CWP1) Technical terms

alpha are defined benefit occupational pension schemes based on your salary in each year of service.

annuity is an income for life, the pension that you buy with the money in your investment fund.

classic is a defined benefit (final salary) scheme which is part of the PCSPS(NI) pension arrangements.

classic plus is a defined benefit (final salary) scheme which is part of the PCSPS(NI) pension arrangements.

**defined benefit** is a type of pension where your pension is based on defined factors, which can include pay, a factor for increasing pensions and service in the scheme.

**defined contribution** is a type of pension where you know how much you will pay. How much it is worth when you retire will depend on investment returns.

final pensionable earnings are the pensionable earnings used to work out your pension if you are a member of premium or classic plus.

final salary schemes work out your pension based on your salary at the time you retire.

**money purchase** is a type of pension where you put money into an investment fund. The fund is used to buy an annuity.

**nuvos** are defined benefit occupational pension schemes based on your salary in each year of service.

partnership is a defined contribution (money purchase) stakeholder pension with an employer contribution. It is part of the PCSPS(NI) pension arrangements.

**pensionable earnings** are all earnings which could count towards your pension. They can include non-cash items, for example uniforms or accommodation.

**premium** is a defined benefit (**final salary**) scheme which is part of the PCSPS(NI) pension arrangements.

**reckonable service** is the years and days that count towards your **classic, classic plus or premium pension**. Generally, each day that you are a member of the scheme reckons towards your pension. Things like strike days and career breaks do not reckon towards your pension.

Stakeholder is a defined contribution (money purchase) pension.
